

ENVIRONMENTAL POLICY

The environment is a common good of vital importance for people 's well-being that we should take care of, both for us andforfuture generations.

DRACE GEOCISA, in the performance of its commitment to continuous improvement and extreme respect for the environment, demands that its worksites go beyond mere compliance with current legislation and, to do so, develops its activity taking on voluntaty commitments based on the following principles:

- a) Plan the processes and carry out the works minimizing the environmental impact.*
- b) Prevent pollution by reducing emissions of greenhouse gases and other pollutants, noise emissions and light pollution.*
- c) Take into account the life cycle ofprojects and services to ensure an adequate use ofmaterials and waste management, reducing their generation, managing them properly and encouraging their reuse and recycling.*
- d) Encourage the use ofsustainable building materials.*
- e) Implement measures to optimize water consumption and reduce the volume or danger of discharges, as well as management plans to preserve or restore biodiversity where our activity has a significant impact on the natural environment*
- f) Train our own staff and raise awareness among suppliers, clients and other stakeholders on environmental issues.*
- g) Take into account those alternatives, both from clients and suppliers, that contribute to favor the environment.*
- h) Share experience and knowledge with other companies, institutions and social partners connected with the environment.*
- i) Comnunicate to stakeholders all relevant information on environmental performance.*

These principles should govern our aclions in order to combine the company 's activity, based on responsible and sustainable construction, with the environment that we need.
